## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "comprising a platinum compound dissolved in an aqueous solution" contradicts the introductory language "Solid Lipid Nanoparticles of a platinum complex". According to the instant specification, the last step in the synthesis of the claimed Lipid Solid Nanoparticles is the lyophilization of the washed lipid microspheres. See also claims 3 and 4, step e. Lyophilization, by definition, is the drying of a frozen sample under high vacuum. Therefore, the Lipid Solid Nanoparticles made in the instant invention does not contain an aqueous solution of the platinum complex but rather a water soluble solid platinum complex. Thus, the claims as now amended are indefinite.

### ***Response to Arguments***

Art Unit: 1621

3. Applicant's arguments filed July 18, 2008 have been fully considered and found persuasive. The Examiner agrees with Applicants argument that the process of making the phospholipid complex of highly insoluble platinum complexes would not lend to be modified in such a way to produce the claimed invention. Thus, the previous rejection of claims 1, 3, 5 and 6 under 35 U.S.C. 102(b) (here the claims as amended are not anticipated by the reference since it does not contain all the elements recited in the claims) and claim 2 under 35 U.S.C. 103(a) are withdrawn by the Examiner.
